DETAILED ACTION

1. Receipt is acknowledged of amendments filed on 6/18/2004.
2. Claims 1-17 are presented for examination.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Armes (US 2001/0034720).

Re claims 1 and 9: Armes discloses system for facilitating a transaction, which includes a poller [means to transmit files to CAS through the STN 15] configured for substantially real-time queuing of a billing transaction file (see fig. # 2; step 105; paragraphs 0084-0088); a splitter [to break a file into multiple subsets, formatting and/or division of transaction files] configured to split the transaction file into at least one subset (paragraphs 0054+), a Card Authorization System CAS 7 configured for authorizing said subset, said card authorization system configured with at least one socket (paragraphs 0059+), and a merger [with means of combining the authorized transactions] configured to reconstruct said subset into said billing transaction file (paragraphs 0043+).

Art Unit: 2876

Re claims 2 and 11-12: Armes teaches a system and method, wherein the transaction file is split into at least one of one, five, and eight subsets 81, 84, 85, 88 (as shown in fig. # 11; paragraph 85).

Re claims 3 and 13: Armes discloses a system and method, wherein the system is configured to operate in substantially real time (paragraph 0072).

Re claims 4 and 14: Armes teaches a system and method, wherein the system is configured to operate on a first come first served [using means of generating a random number to route incoming requests, i.e. performing "queuing" methodology] basis (paragraph 0098).

Re claims 5-6 and 15-16: Armes discloses a system and method, further comprising a logger configured to store factual reference information associated with a plurality of billing transaction file sizes, wherein said logger is configured to recognize at least one of small, medium and large transaction file sizes (paragraphs 0068-0074).

Re claims 7 and 17: Armes teaches a system and method, further comprises a formatter, wherein the formatter is configured to facilitate readability by the Card Authorization System of the transaction files (paragraph 0054; see the limitations of claim 3 of Armes on page 16).

Re claims 8 and 10: Armes discloses a system and method, wherein the billing transaction includes a billing transaction [through step 326b] (paragraph 0113).

Conclusion
